

Jonet - Villar Discussion Follow up FEB18 2026

📅 Wed, Feb 18, 2026 10:45PM ⌚ 30:18

SUMMARY KEYWORDS

data center, multi-purpose dam, hydro electricity, stream tech property, letter of intent, environmental compliance, public information, land acquisition, phase one, phase two, Saudi investor, UAE investor, non-disclosure agreement, due diligence, expression of interest

SPEAKERS

Tim, Kriss.ai Host, JEH Globe iP17, Jonet, Speaker 1, Cristine Opena, Ihna Grace Simon

 Kriss.ai Host 00:28
Hello, Hi, John it.

 Cristine Opena 00:40
Hi, sir. Johnette,

 Speaker 1 02:01
was calling something she got, Okay, where did you? Oh, why did it drop? It, it, it just automatically it dropped. In chills, Okay, Hi, Tim, hello,

 Ihna Grace Simon 02:27
who do we have on? We have Jonathan. You're ready? Hi, Donna. Oh. Tim is here already. Hey, John. It's

 Tim 02:45
is Jonah on mute?

I Ihna Grace Simon 02:50
I think so. Hi, sir, Jonas, if you taught me we cannot hear you yet. I

I Ihna Grace Simon 03:42
Hi, sir Jonet, Hello, can you hear us? Hello, you are on unmute foot. We cannot hear anything.

S Speaker 1 04:01
Watching. Hello, can you hear me text,

T Tim 04:05
yes. Now we can. Now we can,

J Jonet 04:08
okay, okay, okay, yeah, can, can we just wait for Joey a bit? Let me just text it.

J JEH Globe iP17 04:16
Hey, bro, I'm here. Jonet, yeah, stop to the gas station.

J Jonet 04:22
Ah, okay, okay, yeah, so I guess all of us are driving, huh,

C Cristine Opena 04:28
including Tim is also driving all the time you're in the car, yes, okay,

J Jonet 04:35
so Tim, I'm very sorry that we're not able to get back to you as soon as soon as possible, because Joe and I have been bidding for a multi purpose dam project. It's a, it's, it's a really big project, and we're supposed to close the transaction this week. I'm not sure if it's we will be able to make it on time, but yeah, so we've been very busy.

T Tim 05:07
Congratulations. How many megawatts is the dam going to produce?

J Jonet 05:13
Well, we're just bidding on the water side. It's close to 100 MLD. Yeah, it's close to 100 MLT.

T Tim 05:21
Okay, so someone else is going to handle the power side,

J Jonet 05:25
yes, but I think they will bid it out separately later on.

T Tim 05:32
Is, is the dam for hydro electricity, or is it just for drinking water? Right?

J Jonet 05:39
It's a it's a multi purpose dam. So, yeah, it's a hydro electric power

T Tim 05:47
so dams are a great place to put data centers.

J Jonet 05:50

FYI, yes, but the dam is located in the mountainous area somewhere down south, so you know the profile that you're looking for.

T Tim 06:04

No, I've been to the mountains before that. It's too rugged for data center.

J Jonet 06:08

Yes, yes. So actually, the reason why I've requested that you know, to meet with you and Joel, because, actually it's, it's Joel talking to the video group directly. Yes, so the last time we spoke to them. Joel, please feel free to chime in. They said that they're open to sell the stream tech property. The tricky part, though, Tim, is that they're requesting an LOI. When we asked how much, they said, you can make an offer. Is that right? Joel, yes,

J JEH Globe iP17 06:53

the stream tech area, well, it's been put on hold for quite some time. Initially, when we when we spoke to them, they were hesitant to, you know, whether to put it on the block for sale, but after some convincing, they said that it's probably okay if we put in an offer, like a letter of intent, but they're also asking if it's going to be merely the stream tech, stream tech lot where the physical structure, or whatever remains of the physical structures, can at least stand, or you're going to stick to the 15 hectares, or even 30 hectares?

T Tim 07:44

Sure, sure. So I can answer that. You know, when we make plans to do anything, it could be a small data center, phase one. Phase two. We try to couple that with data center demand, and we have to do sometimes it's chicken or the egg. You build a data center, you find the clients later. Sometimes you try to do it together. So the good news is we have two quote, unquote anchor tenants that we think we can put at the stream tech site. So that's something that we need sooner rather than later, and I also we did some research. The concrete pad that we were walking on actually extends further to the right. I didn't know that, but we got an aerial so I think we were looking at the picture and said, Hey, this doesn't really match, but I think there's some area there that they just didn't put the concrete down that was going to be part of the future structure. So it looks like the size of the lot is going to be okay. That's assuming our research is correct. I have some people on my team did a request. Is Ihna here? By any chance?

I Ihna Grace Simon 09:04
Ihna, yes, I'm here.

T Tim 09:07
Can you tell the group what efforts you made to get the public requests for information?

I Ihna Grace Simon 09:13
Oh, yes, sir, by the way, I went to City Hall of Tasman just for me to get the public information for the building permit. However, they can show me the even though the front cover of that file, because it's no longer there, they said it was already been moved to the warehouse. And then I tried to get the, at least the tax declaration, if they can show me about it. But since I don't have any information about the the name of the owner. And they also asked me if I could get an SBA or special program, you

T Tim 09:50
know, you know, I just want to know what they just I don't know what documents you're trying

I Ihna Grace Simon 09:55
to get. Oh, the docs. Hold on the first one. There's two docs, yeah, the east, the ECC, sir team, I need to request it directly in DNR, EMR, I do it online, but if you really need to make it fast

T Tim 10:14
Ina, Ina, just tell me the name of the two docs, because they might have it.

I Ihna Grace Simon 10:20
Hold on, sir, Tim, I just need to check one.

J Jonet 10:23

You talking about the proof of ownership Tina, is that what you're looking for, like the tax Declaration and the title

T Tim 10:32

no to get to get an ECC number, whatever that is,

J JEH Globe iP17 10:38

environmental compliance certificate.

I Ihna Grace Simon 10:40

Oh, okay, okay, yeah, it's, it's been DNR I already requested in foi our website, but it will take 15 working days for us to get it.

T Tim 10:53

So, okay, so, so, okay, okay, I got it, you know. Okay. So, so I need that so I can see how far along they were with the environmental, the permitting and all of that. And that's going to, you know, significantly affect what I can offer and what I can't offer. Was the electricity allocated, is the permitting done, environmental, is it zoned properly? All of that, I think, would be communicated in the doc, where are they going to put the Gen sets? Where are they going to put the transformers? All of those plans would have to be submitted to get that number. So they got the number, and that saves about a year's worth of work, if all of that is there any year's worth money. Okay, okay, so and, and so the you know, the documents will allow me to forward that to our investors. So we have, I would call early stage right now, but we, we definitely have discussions with a Saudi investor that is interested in Philippines. There's another company that's also interested in Philippines called Damac. They're a deep pocketed organization out of UAE, and they're looking at Laguna, right? So I need to know what's but, but I also know because I have friends in stt and and they told me that they haven't picked up the land yet. They haven't done environmental they haven't done any of that. All they did was meet with the President. The president said they're going to support the project and, and that's all they have.

J JEH Globe iP17 12:40

Sorry, Tim, is that the one that that the President signed with a group from Abu Dhabi a few weeks back?

T Tim 12:49

That's That's correct. That's correct.

J JEH Globe iP17 12:52

Okay, if they're looking for land in Laguna, we boxed up the governor there, Jonet and I, we have two other partners. You've met one already. His name is Kriss. He's the he was the one that showed you the land in Cebu. So aside from, aside from the Cebu governor, we also provide assistance and policy direction to the governor of Laguna. So let me know what you need. Okay, we can fast track of these things depending on the investment that they're willing to put in.

T

Tim 13:30

So I'm trying to figure out who I'm going to bring in as partners. I'm very close with the people that runs the the major data center infrastructure in Abu Dhabi. He's a really close friend of mine. I just don't know if they're going to be competitors with us and they're and they want to be in Laguna, or they just want to build a data center. They like the idea of partnering with us and we move them to the site that you have. I don't know, right? So what I'm trying to do is figure out what we have, because if that site is permitted already, that the stream tech site that is way better than going to Laguna and taking raw land. And I think they would agree. So we may partner with them, and they may, I don't know if they'll partner with the Saudis, but that could be pretty strong to have Abu Dhabi, Saudi and our company, US company, doing a partnership in in Kavita, and then we wouldn't, maybe not, maybe not need a a local partner. Or maybe we might, might take a local partner, and they don't have to put up any money. Abu Dhabi Damac, they're building huge, huge data centers in Indonesia, Thailand, and money is no object for those projects. So, and the Saudis also, money is no object. They just want the infrastructure. They want to do it right? And they don't. They don't want to do, you know, they don't want to cut corners like IP or, I don't say that, but, but they're not building the state of the art, you know, data centers, right? The Abu Dhabi people, UAE and Saudi they want state of the art, which is, you know, 300 kilowatts to the rack and up, which is extreme for Philippines. Okay, so if I have more information on, on, on what we can use for phase one, I know there's a lot of demand right now for AI, and it would, it helps us if we have a phase one which we, which would be the stream tech, and then, yes, we cannot do phase one without phase two and three, which is taking more land in that area. In terms of loi, I can, I can do a letter of intent to enter into a purchase and sale. I think that's more appropriate than loi, since I don't even have price yet, or don't have any sort of, you know, any sort of information. I don't know if an LOI is, is the appropriate document, but if you want kind of this precursor to an LOI, letter of intent, I guess we can do that expression of interest. Let's say I mean, I mean, do you want an LOI without any information, like, like, price and what willing to pay? I don't know. I don't even, I don't know how to even make an offer.

J

JEH Globe iP17 16:34

Well, I can I, when I get to the office tomorrow, I'm gonna send a few loi to Jonet. I've prepared Lois for some clients where they've made an offer based on a to z. If A to Z is there, then it's okay.

T

Tim 16:58

If, okay? Yeah, I could do that, you know. But right now I don't know what, what's there. I don't know if it's permitted, if it's if it's if you know, if it's invalid. I have to start all over with the environmental, you know. I don't know right now. So how can I make an offer?

J JEH Globe iP17 17:17

So maybe, maybe Tim, this is just a suggestion. Maybe the letter of intent should include, you know, expression of interest for that particular stream tech area, leading to a letter of intent, if the following can be if the following can be provided. So, you know, ecc, EIA, public consultation leading to the issues of the ECC, what's the validity has the tripartite, tripartite committee, or for the multi sectoral, multi sectoral consultation has that been instituted, the project monitoring team and so on and so forth. You can put all of those there that will eventually lead you to execute a letter of intent for you to have an idea exactly how much to put in the letter of intent, depending on, you know, the kind of documents they can provide you, agriculture. Is it agricultural land? Is it commercial zoning, and so on and so forth. So, for example, if it was recently converted from agricultural to commercial, or in even industrial so, you know, proof of conversion coming from the Department of Agriculture, coming from the local government unit, reclassifying the land, you know, all of those things you can put there. Okay, prior to you formally submitting an LOI so that you can have a a more informed you can make a more informed decision depending on the kind of documentation they can provide.

J Jonet 19:12

Okay, so JEH, what document should we send? So what will be the initial step

J JEH Globe iP17 19:21

for me. I agree with Tim, you know, Expression of Interest initially, you know, just to get the volume, ask for the ask for the doc, you know, ask for the, you know, the, what Tim refers to as environmentals, you know, everything that has got to do, process, you know, project monitoring, team, EIA and so on and so forth.

J Jonet 19:45

So it's like sending a due diligence list,

J JEH Globe iP17 19:48

yeah, something like that. And then, you know, even the, you know, willingness to execute an NDA and so on and so forth, you know, that can send, it will show them that Tim is really serious in this endeavor, except that you can Tim is not in any position to make an affordable offer in Yeah, because, you know, it doesn't really know what the land, What the situation involving the land, is right,

J Jonet 20:21

yeah, because I think you, I hope you understand that the way they explained it to us is that there are many people approaching them. And normally what happens is that these people would just ask questions, make inquiries. But, you know, the level interest is not really there. I mean, it does not come to a point where there was an offer made, so I guess they just don't want to waste everybody's time. So that's why they requested that you know, for for you guys and expression of interest at the very least.

T Tim 21:01

Okay, so let's, let's, let's do the expression of interest, and then let them know that we are looking forward to moving towards an LOI. I'll let you know from my end what we're working on. And then you can tell me if we should mention any of this to couple the expression of interest. So iozera is a US company. We build data centers globally, and then we have 12 portfolio companies that create different technologies, some of the some of the companies you're familiar with, some of them you're not familiar with. And then that draws demand for the data center. We're also, I'm just organizing right now iozera FDI. It's a company that we will use for FDI initiatives. The the JV is is going to consist of several companies that are revenue generating with proof of income and and and proof of funds, approximately 450 million a year right now, as we need more, I add more people to that. JV, right now we have two entities willing to partner with me in that JV, so that is something I can offer them if they're looking for financials or proof of funds. That's something I can offer with the expression of interest. So just let me know, if they want to know what our intentions are for the for the property, I can also provide that how many people we're going to hire, what are? What are? Who are our clients? And that's something that we can do as well. Provide them a deck or video, whatever they want. So you tell me what you think is appropriate. I can give them the whole package, or we can just do the expressive interests with with language that says we're willing to move quickly to an LOI,

J Jonet 23:04

okay, okay, I think let's do expression of interest with all the you know, due diligence items that so that we can request immediately the documents you need,

J JEH Globe iP17 23:16

agree, agree, and then Also the willingness to execute a non disclosure agreement. Yes.

Tim 23:23

NDA, all right, so do you need a full package from us, explaining our our strategic plan or not, at this point, we're happy to give it to you. I just

JEH Globe iP17 23:40

I have some apprehension. Show them exactly what you want to what you want to do. Because, okay, you know, you know how some people are here in the Philippines, you know, they're politicians, slash business people. So yes, we don't want them, you know, getting your idea and running it with

Jonet 24:04

running it

JEH Globe iP17 24:06

on their own. Yeah,

Jonet 24:08

they're not to do that, by the way. They're not so

JEH Globe iP17 24:10

for us, Tim, we don't mind you sending it to us so that at least we have an idea when we talk to them, you know, we can give them a very stripped out version of what you want to do without giving too much details. Sure, pick their interest without them, you know, having any idea how to go about it on their own, yeah, okay,

Tim 24:37

all right, and I think Cristine is going to be the point person for this, and she'll get you the documents for your eyes only, and then I'll leave it to you what you want to filter out of that and your discussion.

J Jonet 24:52

Okay, so tomorrow journal, we'll send Tim a template of the expression of interest, but as for the due diligence items we can suggest. Tim, I can, in fact, put some items on the list right now, but it's really up to you if you want to add, if you want to delete, but yeah, it has to be there so that once we sign an NDA, they can immediately provide all the documents you need.

T Tim 25:23

Okay, but I do have a couple of questions. I was wondering, if you can tell me, does the stream tech land? Is it continuous with the other land or not? Or can it be

J Jonet 25:37

continuous meaning they own the adjacent lots?

T Tim 25:42

So I know that the data center area there was a hill and then a road, and then the other side of the road was the land, right?

J Jonet 25:50

Ai, yes, yes, yes. Okay, they actually yes. It's continuous. Tim, however, they have consolidated the land, meaning to say the it used to be owned by different owners. So meaning to say some lands, they're still in the process of transferring it under their name. Some already under their name. And I assume that the stream tech properties already that the titles under the VR already. Okay.

T Tim 26:24

So in a dream scenario, if we bought the stream tech land that the pad and whatever land we can get around it, could that attach to the land that's being offered.

J JEH Globe iP17 26:39

We'll have,

J Jonet 26:40
we have to check. We'll

J JEH Globe iP17 26:41
have to check that's going to be part of the negotiation and probably included in the expression of interest.

J Jonet 26:48
Yes, we have to include that information. We should request that as part of the expression of interest.

T Tim 26:57
Okay, because I'm trying to draw from memory. It didn't seem like it was, it was too far away. I just forgot what the land looked like between where the stream Tech was and then the land that that's being offered. I thought it was continuous, but I

J Jonet 27:13
it's continuous, yes. And then there's Okay, road that reverses across,

T Tim 27:19
yes, okay, that does make a difference for us. So, so we can call it phase one, phase two, phase three, and it doesn't make sense if it's not continuous, because, well, I guess it still could be okay. But, you know, certainly the stream tech properties is attractive, and we don't know. I mean, just from a speed standpoint, speed to market, it's attractive, but we don't know what they're asking for it. Are they trying to sell it as a data center? Are they selling it as raw land with a concrete pad? We need to know. Did they do pilings? What the soil compression test looks like, and how much megawatt is allocated? Is there transmission lines already set up or planned? Is it there? You know, I don't know. So, so that information is going to help us with an offer,

Jonet 28:12

okay, okay, but we can include those, those items that we need, those information that we need, in the expression of interest. Okay?

Tim 28:23

Okay, all right, I think that's all I have. I'll have Cristine get you the information for your eyes about our plan, and then, like I said, if they ask questions and you have answers,

JEH Globe iP17 28:36

okay, and then, and can somebody please send the summary of the of the chat today, so that we have a reference we can, okay, thank you.

Cristine Opena 28:46

Yeah, we send it to Sir Jonet. Okay, yeah, I'll send it in the group chat, in the WhatsApp.

Tim 28:56

Thank you. Okay, and then Jonet, I'm flying in Jone, I'm flying in on the fifth through the 14th. Just pick a day if you want to meet. If you don't want to meet, that's up to you, but I'll be available, you know, to meet if you'd like to, okay,

Jonet 29:13

March. You mean next month?

Tim 29:15

Yes, yeah, that's the fifth.

J Jonet 29:18
Okay, okay, okay, sure,

T Tim 29:21
and I'd like to get as much done before then as we can to make that visit more productive. We can get some answers within the next couple of weeks. That'd be great. I know it's a new year. How do you celebrate? Just like we do, you know, a whole month, or is it just a couple

J Jonet 29:40
of years, one day,

T Tim 29:41
just one day, okay, yeah,

J Jonet 29:44
the Chinese New Year is done for us.

T Tim 29:47
Okay, okay,

J Jonet 29:49
just one day,

T Tim 29:51
all right, okay, then, yeah, then we'll try, like, as I get as much done as we can for the visit, and maybe we can execute it. Loi by the time I'm there,

J JEH Globe iP17 30:03
okay, okay, sure. All right,

T Tim 30:05
all right. Thank

C Cristine Opena 30:13
you. Good night.
