

Meeting Title: Riverpark Investment & Site Development Discussion

Date: JULY 10, 2025

Participants:

- David Wallace
 - David Leechiu
 - Phillip Anonuevo
 - Timothy Ngo
 - Chandana Hiran
-

◆ DISCUSSION 1: Regional Overview & Site Viability

Power Market Insights & Regional Competitiveness

- PH Philippines has **more stable and diversified power** (geothermal, coal, etc.) compared to ASEAN neighbors.
- Other ASEAN countries (Vietnam, Indonesia, Thailand, Malaysia) are **removing subsidies**, raising power costs dramatically.
- Philippines removed subsidies 25 years ago, making its power sector more efficient.

Riverpark Site Overview

- Location: Around 600 hectares, near Metro Manila and Batangas.
- Major infrastructure developments ongoing:
 - SM Mall (70,000+ sqm)
 - University campus
 - Uniqlo logistics center
 - CALAX highway nearby

Property Details

- Site size: 15–16.7 hectares offered.

- Price: ~\$146M (tax-inclusive ~\$168M), ≈ \$1,000/sqm or \$80–90/sqft.
- Utilities: Water, power, sewage available (no gas).
- Raw land—developer will hand over as-is with utilities connected to perimeter.
- Developer open to negotiation (~10–15% discount possible).

Power & Connectivity

- Transmission line nearby (owned by National Grid Corp of the Philippines).
- Fiber available via telcos, who can directly connect to the site.
- Zoning: FAR 4 (approx. 60 hectares buildable floor area on 15 hectares).

Strategic Talent Pool

- University with AI, Business, Economics, and Liberal Arts planned.
- Workforce from surrounding 5–7M population; BPO industry present.
- Site ideal for AI data centers due to talent access and strategic infrastructure.

◆ DISCUSSION 2: Investment Strategy & Next Steps (Transcript 2)

Power Supply & Validation

- Site linked to First Gen geothermal power plants.
- Power reliability discussions in progress with GT Thermal and other providers.
- Kriss (Tim) will be in Manila Aug 10–17 for meetings and power validation.

Teaming Agreements & Syndication

- Two teaming agreements exist (for Houston and for other locations like Riverpark).
- Multiple investment partners:
 - One requires a **proof of concept** (6-rack data center).
 - UBS looking at PH as an alternative due to drop-offs in Seoul, Osaka, and Melbourne.

- Abu Dhabi investor interested in **land acquisition strategy**.

Development Timeline

- Suggested action: Submit **expression of interest** to landowner ASAP.
- Counter proposal should be subject to:
 - Contract
 - Viability
 - Due diligence
- Urgency emphasized due to increasing interest and mall/commercial developments nearby.

Proof of Concept & Redundancy

- Tim proposed a **low redundancy model**:
 - Less gen sets, lower cost per MW (~\$8M/MW).
 - AI workloads can be re-routed to other regions (e.g., Houston) during outages.
 - Local gen sets respond within 5–10 seconds; UPS supported.

Documents & Deliverables

- Phillip to send:
 - Developer's proposal letter (converted to USD/sqft)
 - Presentation deck
 - Power company summaries (Asin, First Gen, etc.)

Decisions Made

- Proceed with drafting a **counter offer/EOI** to demonstrate interest.
- Explore meeting setup with GT Thermal and others in August.
- Begin syndication talks with multiple investors (proof of concept + land-first strategy).
- Agree on low-cost build approach with software-based AI workload management.

Next Steps

Follow-up Documents (To be sent by Phillip)

- Developer's offer letter (converted to USD per square foot)
- Riverpark site presentation deck
- Presentation summaries from the three power companies (First Gen, Asin/Ayala, etc.)

Meeting Arrangements (August, Manila)

- Coordinate meeting with **PLDT via Metro Pacific** (initiated by Jonat)
- Arrange online or in-person meeting with **GT Thermal** for detailed discussion on:
 - Power supply reliability
 - Generation costs
 - Grid connection feasibility

Due Diligence Preparation

- Collect and send **blackout statistics** within the Meralco franchise area (to support power reliability case)
- Compile list of **recent acquisition deals** in the Philippines (to present to investment partners as local proof of concept)

Formal Offer Preparation

- Draft a **counterproposal** or **expression of interest (EOI)** to the landowner
 - To include key terms: subject to contract, viability, and due diligence
 - Based on zoning (FAR 4) and potential 10–15% price negotiation
 - Reinforce that the site is critical for the fundraise and proof of concept rollout
